Calabar, Nigeria.

Dear PharmaLink,

## **EMPLOYMENT CONTRACT PROPOSAL - COMMITMENT TO PROJECT ENHANCEMENT AND MVP DEVELOPMENT**

I hope this letter finds you well. I am writing to express my strong interest in continuing my collaboration with PharmaLink and contributing to the growth and success of the project. After careful consideration, I am delighted to extend an employment contract proposal outlining my availability, commitment, and proposed deliverables for the upcoming project.

**Availability:** I am excited to offer my services as a Frontend Engineer for Pharmalink. Based on our discussions and the project's requirements, I am prepared to commit to working for five hours per day, allowing me to focus on delivering high-quality work while maintaining a healthy work-life balance.

**Project Enhancement and MVP Development:** In the proposed contract, I am ready to undertake the following tasks to enhance the project and develop a Minimum Viable Product (MVP):

**Code Remodification:** I will thoroughly assess the present codebase to identify areas for improvement and implement necessary modifications to optimise its performance. This will involve highlighting all issues, conducting comprehensive debugging, refactoring the codebase, user interface redesigning(if necessary) and streamlining the code to ensure a smoother user experience and improved functionality. Throughout this process, I will utilise the team's project management tools such as Trello to assign tasks(if necessary), track progress, and maintain effective communication.

**Patient-Pharmacist File Sharing Feature:** I will develop a secure and user-friendly feature that enables patient users to share files with pharmacist users upon request. This feature will be designed to safeguard privacy and provide a seamless means of communication between patients and pharmacists. I will employ industry-standard methods and best practices to ensure data security and an

intuitive user interface. The process for achieving this feature will involve in-depth research, designing the secure file-sharing mechanism, implementing privacy safeguards, and integrating it seamlessly into the existing system.

**Integration with Blockchain Payment System:** I will connect the project to a blockchain-based payment system, allowing users to make payments using their blockchain accounts. This integration will involve thorough research, implementing appropriate APIs, and following established protocols to ensure secure, transparent, and efficient transactions. Additionally, I will ensure the necessary steps are taken to connect the project to the blockchain payment system, including configuring the system to handle payment transactions and integrating it seamlessly into the user flow. This process will leverage my knowledge of blockchain technology and payment gateways.

**Project Implementation Timeline:** To provide transparency and set clear expectations, I have outlined a high-level timeline for the proposed tasks:

**Phase 1: Code Remodification (Estimated Total Duration: 2 weeks from beginning of project's v1)**

- Highlight all issues and areas for improvement.
- Conduct comprehensive debugging and refactoring.
- Streamline codebase for improved functionality.

**Phase 2: Patient-Pharmacist File Sharing Feature (Estimated Total Duration: 2 weeks after finalisation of remodification.)**

- Research and produce a secure file-sharing feature.
- Implement intuitive user interface and privacy safeguards.

**Phase 3: Integration with Blockchain Payment System (Estimated Duration: 2 weeks from the finalisation of the file sharing feature.)**

- Research blockchain payment systems and relevant APIs.
- Implement secure and efficient payment system integration.

**PLEASE NOTE:**

The project timeline is a collaborative effort, and it's important to recognize that various factors can influence its pace. We understand that feedback, data/API provision, and asynchronous work may take time in lengthening or shortening the project's expected duration, and we appreciate your efforts in managing these aspects effectively. By working together in a responsive and efficient manner, we can enhance the project's momentum. Rest assured, I will provide regular progress updates and ensure that we stay aligned with the agreed-upon phases throughout the development process. Your cooperation and support are greatly valued as we strive to achieve our shared goals.

Compensation: In terms of compensation, I propose a rate of 1500 Nigerian Naira per hour. Through extensive research on industry standards within the Nigerian market, I have carefully considered the scope, complexity, and the value I bring to the project. This rate is set at a fair level and provides a solid foundation that acknowledges the expertise and commitment I will bring to enhance the project and deliver valuable outcomes. I am open to further discussion to ensure we reach a compensation agreement that is both fair and mutually beneficial.

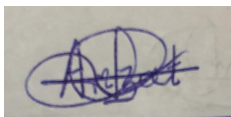

Given my experience with the team as a whole in configuring the different types of users' dashboards and their functionalities, I am confident in my capabilities to enhance the project and deliver valuable outcomes. I am available at your convenience to further discuss this proposal and address any questions or concerns you may have.

I believe that my dedication, expertise, and commitment to achieving project milestones make me an ideal candidate for this role. I am confident that by working together, we can accomplish outstanding results and contribute to the success of PharmaLink.

I would also like to express my openness to discussing the possibility of an extension to an open-ended contract upon successful completion of the mentioned features. I believe that the continued collaboration beyond the initial project would allow me to further contribute to the growth and success of PharmaLink, bringing additional value to future endeavours.

Thank you for considering my proposal. I await the opportunity to continue my collaboration with PharmaLink and contribute to the advancement of the project. I look forward to hearing from you soon.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Sheriff Amzat', is written over a light blue horizontal line.
